FOR IMMEDIATE RELEASE

UBIC PARTNERS WITH StoredIQ TO PROVIDE LITIGATION & INVESTIGATION READINESS SOLUTION

Global eDiscovery Experience with Fast Data Indexing Result in Cost Reductions for Corporate Litigation and Investigation Risk

Global eDiscovery service provider UBIC, Inc. partners with intelligent data indexing provider StoredIQ to offer integrated eDiscovery Readiness solution prior to and after litigation notification.

Tokyo, Japan (PRWEB) September 8, 2009 – UBIC, Inc. and StoredIQ, Inc. announce their new joint solution offering to help companies prepare for and address litigation risks and costs. By combining the international eDiscovery experience of UBIC with the cutting edge data indexing and preservation systems from StoredIQ, our new partnership offers a complete solution to the pressing challenge of litigation preparedness, early case assessment, and rapid, cost effective response.

In US Federal Court litigation, Federal Rules of Civil Procedure (FRCP) Rules 16 and 26 are fast becoming a favored plaintiff playbook and a defendant's burden. To properly comply, every company is faced with the same challenge, where is our data, how long does it take to find and why is it so expensive to review our own data?

StoredIQ's intelligent information management system provides pre litigation data indexing and classification for immediate access in legal matters. A central server proactively indexes data sources, tagging and classifying data for fast early case assessment and easy legal review delivered securely behind the corporate firewall.

UBIC's broad experience working with law firms and global client corporations entangled with international litigation matters provides skilled early case assessment and fact discovery services/solutions. Easily identified responsive, non privileged data is processed, searched, analyzed and prepared for legal review – accurately, defensibly, fast and inexpensively.

Through combining the StoredIQ technology with UBIC fact discovery expertise and global resources, pre and post litigation or investigation data handling is proactively managed providing our client companies with complete in-house control and support of their sensitive and responsive documents to any investigation or litigation.

About UBIC:

UBIC, Inc. is the industry leader in providing Asian computer forensics and eDiscovery for civil litigation. The company provides a full range of eDiscovery solutions throughout Asia with a high-tech forensic laboratory located in Tokyo. In August 2003, Masahiro Morimoto started UBIC, Inc. in Tokyo, the first and only Japanese Computer Forensic and eDiscovery services company. UBIC offered a mix of computer forensic tools and training to the National Police Agency in Japan, while performing internal investigations for major Japanese corporations. In 2005 UBIC began providing eDiscovery support to these same corporations involved in civil litigation out of the United States. In 2007, UBIC North America, Inc., a wholly owned US subsidiary was established to provide trans-pacific support to our clients in the US. For more information, visit www.ubicna.com. To contact our US office, call 1-877-321-UBIC (8242) or email usinfo@ubicna.com.
